1. Claims 12-13, 18-20, and 33-34 are allowed.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Qian et. al. (6,136,211) as applied in paragraph 7 of the previous office action.
5. Applicant's arguments filed 12-17-03' have been fully considered but they are not persuasive.

Applicant argues the following points regarding the examiner's rejection of their claimed subject matter.

-The applicant cannot see where in the prior art applicant's claimed invention is disclosed or taught as is asserted by the examiner. Applicant therefore

concludes that their claimed invention is not obvious in view of teachings of the prior art as is asserted by the examiner.

The examiner must disagree.

-Qian et. al. does teach applicant's invention as is claimed by the applicant in claim 21. (Please especially note columns 8-9, 11, 13, etc. in this regard.)

Claim 21 is written in a very broad manner, and only requires the presence of a plasma etchant which contains a bromine based compound in combination with a chlorine based compound or other specified compounds. Qian et. Al. teach a plasma etchant, which may be comprised, have one or more gasses selected from the group of Cl<sub>2</sub>, HBr, etc. Thus, applicant's claimed plasma etchant is taught by Qian et. al. contrary to what applicant purports.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
